

REAL-TIME MONITORING AND OPTIMIZATION OF RESOURCE EFFICIENCY IN INTEGRATED PROCESSING PLANTS

**Frankfurt, Germany**  
**February 15<sup>th</sup> – 16<sup>th</sup>, 2017**

# **Real-time Monitoring and Optimization of Resource Efficiency – From Measurements to Optimal Operation**

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 604068.

- Kai Dadhe, Evonik
- Alex van Delft, DSM
- Martin Jenke, CEMEX
- Stefan Krämer, INEOS
- Günther Windecker, BASF
- Martin Winter (CEFIC, A.SPIRE)
  
- Moderator: Sebastian Engell, TU Dortmund

- In your view, what is the potential of real-time resource efficiency monitoring?
- How do you see the applicability to your company/industry?
- In which plants can or should they be applied, and in which ones presently not?
- How long will it take to implement such solutions on a broad basis?
  
- What are the obstacles for the broad application of the technologies developed by MORE?
- What can be done to overcome them?
- **Which challenges should be addressed by future projects?**
